PROJECT SYNOPSIS

TITLE :- **STUDENTS REPOSITORY SYSTEM**

Introduction

Students repository system for college students have been developed which aims to gather all the important documents like Notes, Tutorials, Scholarships and Internship details for a particular discipline .

Students repository system is a place for students, to upload, download and manage all the above mentioned components.

Not only this, By keeping Security and Privacy in Mind, We also made an ADMIN to look after the documents, that were being uploaded by various students!

The system also reduces the burden of efforts and burden of keeping and maintaining the records on a manual base, it requires a lot of space and safety to keep up such records.

The documents uploaded by any of the students cannot be viewed by others unless and until the admin of the repository checks and accepts the uploaded component.

System Actors(Users)

• Admin

• Students

Admin Features

• Admin can :

1. Login

2. Accept the request of new students login
